

Field Log - How Many Holes on the Course

Step 1:

Dr. Wick wants to know how many of his triangular hole designs can fit on his golf course. Use the shapes and ruler in the map below to find how many triangular holes can fit on the course. You can draw on the map if you need to!

Explain how you are calculating the number of holes that will fit on the lines below.

Step 2:

Report the total number of triangular holes you can fit on Dr. Wick's golf course.

Total Number of Holes:

Sum it Up:

Brainstorm a list of the different ways you could figure out how many triangles would fit on the course.
